

APPENDIX 9

RESEARCH PROPOSAL CERTIFICATION
School of Pharmacy and Pharmacal Sciences

It is a policy of the School of Pharmacy and Pharmacal Sciences that every Ph.D. student must complete, as a requirement for the Ph.D. degree, a written original research proposal on a topic approved by his/her Department. The form of the proposal and the nature of the examination is left to the discretion of the student's Department, provided that the proposal must be examined by a committee appointed for that purpose. The committee may be the student's Oral Preliminary Examination committee, but may also be a separate committee.

The following certification that the student has met this requirement must be filed with the Associate Dean for Research and Graduate Programs before the student will be approved for the Ph.D. degree.

Date: _____

Student Name _____

We certify that the original proposal entitled

meets the standards of the _____ Department and therefore fulfills the School Ph. D. requirement for an original research proposal.

Examining Committee Signatures:

_____, Chair
